

DOUBLE MAJOR IN SCIENCE & ARTS APPLICATION

A Double Major in Science and Arts is available to students in a BSc program. All requirements of the Faculty of Science and the first Major program must be satisfied. As far as the Arts Major is concerned, you only need to satisfy the remaining requirements for the BA major (i.e., at least 42 and not more than 60 Arts credits in one subject or field of specialization, including at least 30 upper-level credits). Arts courses may satisfy requirements for the BSc. You should aim to satisfy lower-level course prerequisites for both majors in their first two years.

Applications are accepted from the beginning of your third year, after you have been in your Science Major for a year. Applications will not be accepted once you have been promoted to fourth year class standing. Entry into and continuation in a Double Major option requires that you remain in good academic standing with an average of at least a C (60%) in each term. You should be aware that in most cases it will not be possible to complete a Double Major in four years. All BSc degree requirements must be completed within a maximum of 180 attempted credits.

RESTRICTION: Students completing a BSc major in one of the following disciplines may not also complete a BA major in the same field of major: neuroscience (psychology), cognitive systems, computer science, geographical sciences (geography), mathematics, mathematical sciences, mathematics and economics, and statistics and economics.
